### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or disclose, in combination with the remaining features of the claims, a degaussing circuit comprising a switching part and a chargeable device connected to one of the first and second input terminals of the degaussing coil and which removes a potential difference applied between the first and second terminals of the degaussing coil when the switching part is turned off (claim 1); a degaussing coil, a switch which selectively applies the alternating current to the degaussing coil, a thermistor; a transistor which controls operation of the switch according to a control signal, and a capacitor, connected between one of the first and second coil input terminals and a potential and which conducts a residual current in the coil at a time of turning off the switch to the potential (claim 5); a method of eliminating a residual magnetic field in a degaussing coil of a picture tube, the degaussing coil receiving a time diminishing AC current to perform a degaussing operation, the method comprising: coupling at least one of the first and second coil input terminals to a potential through a chargeable device so current flowing in the coil at a time of turning off the current is passed to the potential (claim 7).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
